

DRINKING WATER QUALITY PROGRAM
DRINKING WATER CONSTITUENTS WORK GROUP
MEETING AGENDA

- 1:30 - 1:45 Welcome and Introductions - Judy Heath (CALFED)
- 1:45 - 2:00 Overview of Drinking Water Quality Program and the Relationship of
Work Group to CALFED Program - Judy Heath (CALFED)
- 2:00 - 2:30 Other Work Group Updates (regular item on future agendas):
 Salinity/Selenium Work Group - Lynda Smith (MWD)
 Veale/Byron Tract - K. T. Shum (CCWD)
 Operations Group - David Briggs (CCWD)
- 2:30 - 2:45 CALFED Comprehensive Monitoring, Assessment and Research Program
Update - Leo Winternitz (CALFED)
- 2:45 - 4:30 Define Action to Assess Sources and Magnitudes of Drinking Water
Constituents of Concern - Work Group Discussion
Goals:
- To specify the scope of actions which are feasible and cost effective to achieve reduction in pollutant loads and to improve sources of drinking water.
 - To plan for implementation which includes a workplan, estimation of costs, a finance plan and a schedule for implementation.
 - To identify lead agencies which can be state, federal local government or other cooperating agencies/entities.
 - To identify monitoring and research needs.
 - To identify any necessary environmental documentation and permits for any projects.
 - To establish baseline conditions to measure continuous improvement.
 - To identify the approach(s) to measure improvements.
- Intended Outcome:
- Agreement on scope of actions, costs.
 - Agreement on implementing entities.
 - Recommendations on funding sources (e.g. CALFED and co-funders).
 - Outline for Work Plan.
 - Writing assignments (for sections of the Work Plan).
